JAN 2022

Our conversion necks allow you to simply swap the neck of your Deimel Firestar and get a different scale. Depending on which neck you choose, the scale length will be longer or shorter and frets are adapted to that specific scale. The bridge will always stay in the same position and won't be touched. So changing from a long scale to a short scale guitar has never been easier. You only unscrew the neck that is attached to your guitar and drop in the conversion neck you prefer. After tuning your Deimel Firestar you are ready to even more amazing sound options.

NOTE: Deimel Firestar conversion necks only fit Deimel Firestars and won't be build without the certainty that you are in possession of a Deimel Firestar.

Once both of us have determined the main specifications, we will send you an official order confirmation and ask for a 40 % deposit in order to start the build. All prices stated are without German VAT. If you are residing outside the EU or you are holding an EU VAT business number, no German VAT applies.
